

GLOBAL MESH — JOIN

any device · one private network · owner-approved

STEP 1 — everyone installs Tailscale

the private mesh. install + sign in on every device.
then the owner approves you (least-privilege).

scan to get it

STEP 2 — set up your device

iPhone / iPad

- App Store: Tailscale + a-Shell
- ssh into your node, type a word
- one-tap buttons via Shortcuts

Android

- Play: Tailscale · F-Droid: Termux
- pkg install openssh; ssh in
- Termux:Widget = home buttons

Mac / Linux

- paste the one-liner (below)
- pick owner or operator
- then just type: menu

git

Windows

- install Git + Tailscale
- open Git Bash
- paste the same one-liner

git

Mac / Linux / Git-Bash — paste this one line:

`curl the repo → bash scripts/join` (see G0.md for the full line)
