

TMMT

RUN THE WHOLE BUSINESS

from your laptop + your phone

LAPTOP

the engine

BRAIN

does the work

PHONE

your remote

2 STEPS TO GO LIVE

1. Plug in the laptop
2. Run `tmmt up`

For Muhammad + Moe

Simple as pressing a button.

TURN IT ON

Do this every morning. Takes 1 minute.

1

Plug in the laptop

Power + internet. Leave it plugged in.
It carries the load. Don't close the lid.

2

Open the black window

It's called Terminal.
Spotlight (cmd+space) → type Terminal → Enter.

3

Type one thing

bash scripts/tmmt up
then press Enter.

4

Wait for GREEN

Green check = you are LIVE on the mesh.
Now leave it running. You're done.

EVEN EASIER

Don't like typing? Use the button menu.

1

Double-click TMMT-MENU

It's in your TMMT folder.

A menu opens in the black window.

TMMT CONTROL

- 1) Turn it ON
- 2) Who's online
- 3) I NEED HELP
- 4) Do work (agents)
- 5) Health check
- 6) Sync now
- 0) Quit

2

Press a number

Press 1 to go live. Press 3 if you need help.
That's the whole system. Promise.

FROM YOUR PHONE

Be mobile. The laptop does the heavy lifting.

1

Talk in Slack

Open Slack → #ops. Type what you need.
The team AND the brain see it.

2

Buzz for help

In Slack type: help
Or on the laptop: tmmt help "what's wrong"

3

Power move: control the laptop

Install the Termius app on your phone.
Tap your laptop → you're typing on it from anywhere.

4

It stays in sync

Every laptop + phone shares one brain.
Pick up on any device, right where you left off.

WHEN IT BREAKS

Nobody panics. Help is one word away.

1

Something's wrong?

Don't guess. Don't poke around.
Just ask for help ↓

2

Send the SOS

tmmt help "engine won't start, customer waiting"
(or press 3 in the menu)

3

The owner gets buzzed

Muhammad gets it on his phone instantly.
He sees who, where, and what.

4

Help arrives

He jumps in — by your side, or remotely
over the secure mesh. Fixed. Back to work.

THE ONLY WORDS YOU NEED

Type `bash scripts/tmmt` then one word.

up

turn on + go live

who

who's online

help "..."

buzz the owner

go

start the agents working

sync

get the latest

fix

health + safety check
